

Panel 3F: Energy efficiency on local level

Panel Leader: Iva Svobodova
People in Need
Bosnia Herzegovina

Panelists

- **3F1 Aggregation of projects in a delivery mechanism for local energy efficiency implementation**
Ksenia Petrichenko
Copenhagen Centre on Energy Efficiency
Denmark
- **3F2 Local actors and integrated planning in modernizing district heating systems.**
Edith Bayer&Jan Rączka
RAP&Alternator
Belgium
- **3F3 Deep renovation of residential MFH. Case studies and strategies**
Andrzej Rajkiewicz
National Energy Conservation Agency
Poland

How to implement EE projects at local level - Summary of main take aways

- Integrated approach needed
 - In case of district heating one should address source distribution & buildings
- Coordination among stakeholders is essential
 - Self-governments need to take a lead
- Scale matters
 - It is important to aggregate projects into larger programs for financiers
- Municipalities must invest into communication of benefits
 - Mind set change can be reached by knowledge transfer, explanation of health benefits and sharing of good examples
- Municipalities need to cooperate with house associations who might be eligible for loans
- Most important is presence of heavy investments
